

100%. All the way. No brakes. DIY or death. In 2008 The Kendolls bought a van in Gothenburg and started touring Europe. Without really knowing anything they just started doing it. Through playing squats, floors, bathrooms and clubs the band learned through their craft by mistakes and adventures. Eventually their live show and their songs got better and they signed with Alleycat Records in 2011.

Third album, *Automania*, is a modern punk rock album built on garage, rock'n'roll and hardcore vibes, combining the darkness, the joy and the dancing tunes of the underground. Recorded in between breaks of nonstop DIY touring, you can sense the chaos, the energy and the sleepless nights that breaths through this effort. The Kendolls celebrates what they know - the boredom of life in the suburbs, the meaningless war on drugs and mental illness. The Kendolls throws a declaration of independence out there.
